

RITTIK PATI

AI Engineer | LLM Engineer | Generative AI Developer | ML Engineer

India | +91-7501967362 | rittikpati434@gmail.com | linkedin.com/in/rittik-pati-229389290 | github.com/rittikpati

PROFESSIONAL SUMMARY

Forward-thinking AI / Machine Learning Engineer (B.Tech CSE - AI & ML, CGPA: 8.2/10) with hands-on expertise architecting production-grade LLM applications, RAG workflows, Agentic AI systems, and microservices. Proven track record of leveraging modern AI frameworks (DeepSeek API, LangChain, PyTorch) and cloud environments (AWS, Docker, CI/CD) to automate complex enterprise workflows, optimize latency by up to 35%, and reduce customer support response times by 30%. Skilled in full-lifecycle SDLC, RESTful API design, and scalable backend engineering.

TECHNICAL SKILLS

Core Languages:	Python (PyTorch, NumPy, Pandas), SQL, JavaScript (ES6+), HTML5, CSS3
AI & Generative AI:	LLMs, Retrieval-Augmented Generation (RAG), Agentic AI, AI Agents, Prompt Engineering, LangChain, LlamaIndex, DeepSeek API, NLP, Vector DBs (ChromaDB, Pinecone)
Backend & APIs:	Django, Django REST Framework (DRF), FastAPI, Node.js, Express.js, RESTful APIs, Microservices, JWT Auth, CSRF Security
Cloud, DevOps & DBs:	Docker, AWS (S3, EC2), PostgreSQL, Neon Cloud DB, MongoDB, Redis, Git, GitHub Actions, CI/CD, Vercel, Cloudinary, WhiteNoise
Frontend & Viz:	React.js, Redux, Bootstrap 5, Chart.js, Responsive Web Design

PROFESSIONAL EXPERIENCE

AI Business Solutions Architect Intern — **YuvaIntern** (Remote) 08/2026 – Present

- Integrated DeepSeek LLM API to facilitate natural-language user interactions, automating 70% of routine CRM tasks, boosting operational workflow productivity by 40%, and cutting customer inquiry response times by 30%.
- Architected and evaluated high-throughput LLM pipelines and RAG workflows across 5+ enterprise AI use cases, improving retrieval accuracy by 25% through optimized vector embeddings and dynamic chunking strategies.
- Translated complex business specifications into scalable AI architectures, designing RESTful API microservices that processed 10,000+ simulated daily requests with 99.5% uptime.
- Authored technical documentation, API specs, and automated benchmarking test suites, accelerating cross-functional deployment decision cycles by 35%.
- Collaborated with cross-functional engineering teams to conduct feasibility studies, model accuracy evaluations, and cost optimization for client-facing AI systems.

KEY PROJECTS

RittikDesk AI — **AI-Powered CRM & Campaign Management Platform** 2026

Technologies: Python, Django, DRF, PostgreSQL (Neon DB), DeepSeek LLM API, Chart.js, React, Docker, Vercel | **GitHub:** github.com/rittikpati/RittikDesk-AI

- Engineered an end-to-end full-stack AI CRM platform featuring automated lead routing, multi-channel campaign automation, and real-time sales pipeline analytics.
- Designed and built 15+ production-ready RESTful API endpoints using DRF and PostgreSQL (Neon DB), reducing database query overhead by 22% via optimized ORM indexing.
- Developed interactive real-time analytics dashboards using Chart.js and React, increasing sales reporting efficiency by 45% for active campaign managers.
- Implemented enterprise-grade security including JWT authentication, CSRF protection, secure environment variable management, pagination, and automated CSV data ingestion pipelines.
- Containerized application using Docker and deployed on Vercel with Cloudinary media routing and WhiteNoise static asset caching.

EDUCATION

Bachelor of Technology (B.Tech) — **Computer Science Engineering (AI & ML)** Expected 08/2027

Chandigarh University, Punjab, India | **CGPA:** 8.2 / 10

Relevant Coursework: Data Structures & Algorithms, Artificial Intelligence, Machine Learning, Deep Learning, DBMS, Object-Oriented Programming (Python), Software Engineering, Computer Networks, Operating Systems, Linear Algebra & Statistics

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Oracle Agentic AI Foundations Associate:** Certified in designing and deploying autonomous AI agents and workflows (2026).
- Building RAG Applications Using MongoDB:** MongoDB Certified Developer in Retrieval-Augmented Generation & Vector Search (July 2026).
- Microsoft Learn Credentials:** Certified in Artificial Intelligence Solutions, Azure Cloud Fundamentals & Machine Learning Pipelines.
